

Joanna liked wearing black and colouring her hair dark shades.

After a colour analysis Joanna recognised she needed to wear Bright Cool colours and changed her hair back to her natural colouring and then added some blonde high lights.

This has made her look healthier, younger and more vibrant.

Richard **enjoyed wearing black until he had a colour analysis and realised how pale** and drained he looked.

His colouring is bright and light and when he wears the correct shades of colour he is noticed and not his clothes. He looks healthier, his sparkling blue eyes are more noticeable and he looks more energetic and bubbly.

Julie was another person who enjoyed her black, but after her session of colour analysis she could see that it was too deep for her light colouring.

She is much healthier, younger and more vibrant in light bright colours.
